

I am writing to express my concern over the possibility that LPFM radio stations may be allowed priority over existing FM translator services. My entire family listens to KLOVE in Denver on 91.1. This station not only provides uplifting, positive programming for my husband and myself, but for my three children as well. It is very difficult to ensure a G rated environment for children in today's world and KLOVE allows us to listen worry free as a family. We need more wholesome alternatives like KLOVE in our society and I sincerely hope you will not allow such a positive program to be taken off the air. If it were not for KLOVE, I would not allow my children to listen to radio. KLOVE provides local events, entertainment and news as well as great music. KLOVE is a positive part of our community. Please do not allow some other less positive program to displace the station we have come to love and listen to every day!
